The screenshot shows the EBSCO Discovery Service homepage. At the top, the EBSCO logo is on the left, and navigation links for 'New search', 'Browse by', and 'Research tools' are in the center. On the right, there is a globe icon, a 'MyEBSCO' button, and a blue circle with the number 5. Below the navigation bar, a search bar is labeled 'Search articles, books, journals & more' with a blue circle and the number 1. To the right of the search bar are links for 'Advanced search' and 'PICOT'. Below the search bar are filters for 'Peer Reviewed', 'Available in Library Collection', 'Full Text', and 'All dates'. To the right of these filters is a blue circle with the number 2 and a toggle switch for 'AI-assisted search' with a link 'What's this?'. Below the filters, a section titled 'Flipster titles' with a blue circle and the number 4 displays five magazine covers: 'The New York Review of Books', 'National Geographic', 'Bloomberg Businessweek', 'Archaeology', and 'ScienceNews'. To the right of the magazines is a link 'Explore collection'. At the bottom right, there is a chat icon with a blue circle and the number 6. At the bottom of the page, there are links for 'Privacy policy', 'License agreement', and 'Manage my cookies', and a copyright notice: 'Software © 2026 EBSCO Publishing, Inc. All rights reserved'.

Impact of air pollution on life expectancy in Asian developing countries: Does renewable energy adoption matter?

By: Yang, Bo; Hassan, Fatma Ahmed; Ahmad, Waqar; +3 more • In: Frontiers in public health, 2026 Apr 02, volume 14, page 1724402 • MEDLINE Ultimate

Air pollution (AIRP) remains a critical public health and environmental challenge in developing Asia, where rapid industrialization and fossil fuel dependence continue to undermine population health and longevity. This study examines the impact of AIRP on life expectancy (LIFE) and investigates whether renewable energy adoption can mitigate these effects. The study uses a longitudinal dataset from 2010 to 2020 across 10 Asian countries. Results show that higher levels of AIRP are associated with lower life expectancy, and that countries with higher renewable energy adoption rates show a positive correlation with life expectancy. The study concludes that promoting renewable energy is a viable strategy to improve public health and environmental sustainability in developing regions.

Renewable energy : sources for fuels and electricity / edited by Thomas B. Johansson [and others], executive editor, Laurie Burnham.

FOLIO Demo Catalog

Review: *Renewable Energy: Sources for Fuels and Electricity* provides a sound and thorough look at the need to find new ways to meet the growing demand for energy. Because of the increasing severity of problems posed by conventional sources of energy - threats to the security of the world's oil supply, the environmental costs... Show more
