

New Full-Text Resources from EBSCO

October 2026

Research & Learning

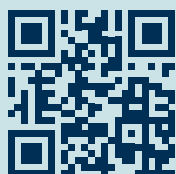

Urban Studies Source

This new full-text database covers topics such as urban planning, development, city life, and city governance.

Environment Source Ultimate

This comprehensive full-text database provides authoritative research focused on environmental studies, sustainability and the natural world.

Art Source Ultimate

As the largest full-text database for art research, it supports interdisciplinary study across fine art, art history, design, crafts and media.

Avery Index to Architectural Periodicals with Full Text

Produced in collaboration with the Avery Architectural & Fine Arts Library at Columbia University, Avery Index to Architectural Periodicals with Full Text provides full-text journal articles covering architecture, design, historic preservation, interior design and related fields.

Child & Adolescent Studies Source

This database provides authoritative research on how children and teens grow, develop, and thrive, covering cognitive, social, emotional and mental health from early childhood through adolescence.

GeoRef with Full Text

Developed in partnership with the American Geosciences Institute (AGI), GeoRef with Full Text combines AGI's trusted geological indexing with high-quality full text from leading journals and magazines central to the study of geology.

Indigenous Studies Source

This unique database covers the 50 largest Indigenous populations worldwide and their heritage and experiences.

RIPM Jazz Periodicals: Music, History, and Culture

Produced by the Répertoire International de la Presse Musicale (RIPM), RIPM Jazz Periodicals is a full-text database featuring a unique collection of rare and historically significant jazz periodicals, offering a window into the evolution of jazz and its connections to twentieth-century history, culture and society.
