

7 WAYS

CINAHL Ultimate Helps Turn Evidence into Action

- 1 Connect nurses and allied health professionals with trusted evidence**
Give nursing and allied health teams access to peer-reviewed nursing and allied health literature that supports evidence-based practice, education and clinical decision-making.
- 2 Make relevant research easier to discover**
Help users navigate growing volumes of research with intuitive search and AI-enhanced discovery tools designed to surface relevant evidence more efficiently.
- 3 Improve search precision**
CINAHL Subject Headings help users search by standardized concepts and uncover relevant research that keyword searches may miss.
- 4 Turn clinical questions into focused searches**
PICOT workflows help users structure clinical questions and build more focused searches for relevant evidence.
- 5 Support advanced nursing research**
Advanced search experience, Search History and Search Sets support rigorous research workflows, including systematic reviews and other complex research.
- 6 Strengthen nursing education and clinical competency**
Instructional videos, Quick Lessons and Evidence-Based Care Sheets reinforce nursing knowledge, procedures and best practices.
- 7 Advance professional development**
Continuing Education modules support ongoing learning, licensure and professional development.

Move From Evidence to Action

By bringing trusted nursing content, precise indexing, advanced research tools and instructional resources together, CINAHL Ultimate helps nursing educators, researchers and health care leaders connect evidence to education, practice and clinical improvement initiatives.
