

Benefits for Librarians

Librarians love eReserve Plus for its flexibility and ease of use

The selection, organization, and delivery of educational resources is one of an institution's most critical functions. The imperative to deliver such resources digitally is increasing, and eReserve Plus is the only software package that delivers a solution for every facet of this revolution in tertiary education. Start understanding resource usage and student engagement and make evidence-based decisions.

Resource and student analytics

With eReserve Plus, the library and faculty can see immediately which materials have high levels of engagement. This makes it easy to identify at-risk students and make better purchasing decisions.

Improved workflow

eReserve Plus builds bridges between operational units, removes bottlenecks and allows everyone involved in the creation, consumption and administration of resources to work together better and more efficiently.

Rapid onboarding

Our dedicated on-boarding team will work with you to develop an implementation plan to suit your needs, and we'll be with you every step of the way. eReserve Plus integrates smoothly with all major library, discovery and learning management systems.

Best-in-class copyright

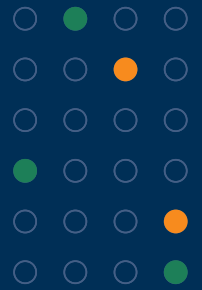

Our category-leading functionality means your team undertakes best practice copyright management (ALA Fair Use assessment tool included), and create a prudent, defensible position against litigation.

Easy resource list management

Whether faculty chooses to create their own resource lists or rely on a full-service library model, resource list creation is a breeze. Discover and select the resources you want, click, and drop them right into course content.

User-friendly interface

eReserve Plus simply makes everything easier for everybody. Drag and drop features, color coding and support for numerous citation methods makes eReserve Plus the most accessible, user-friendly resource management system ever developed.

Benefits for Faculty

Faculty love eReserve Plus because it frees up time for teaching

eReserve Plus takes the headache out of resource list creation and management, and offers detailed student analytics data for content optimization, insights to assist student success, and rapid, easy to manage copyright compliant resource lists. Start understanding student engagement and make evidence-based decisions and save time.

Easy resource lists

eReserve Plus offers faculty the flexibility of a library full-service model, or the ability to create lists themselves in a streamlined process as simple as online shopping.

Save faculty time

eReserve Plus speeds up the creation, management and distribution of learning resources so everyone's on the same page, working better together.

User-friendly interface

Drag-and-drop features, library discovery search, color-coding, world-class accessibility standards and support for numerous citation styles make eReserve Plus the easiest to use digital distribution system ever developed.

Student analytics and insights

eReserve Plus's student insight capabilities help faculty know who is reading what and how well engaged students are. Faculty can easily identify underutilized resources, spot at-risk students and optimize course content.

Rollover function

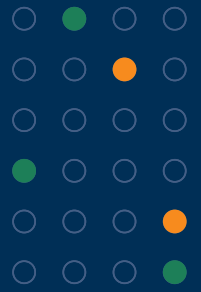

Reusing a resource list for a new student cohort is a simple process. No more laboriously entering the same resources year in, year out.

Distribute any learning resource

Comprehensive resource lists including links, PDFs, articles, audio and video can be created and disseminated with just a few clicks.

Everybody wins!

Benefits for Management

Management love eReserve Plus's efficiency and rapid ROI

Automating so much of the busy work involved with resource list creation and copyright management means eReserve Plus starts to deliver savings on day one.

eReserve Plus also surpasses others in the category with its advanced copyright and license functionality, which can save universities millions. Start understanding resource usage, student engagement and make evidence-based decisions.

Impressive ROI — fast

For every dollar spent on licensing fees, another is spent on copyright administration. eReserve Plus has a focus on rapid ROI, creating new, measurable savings from the very moment it's implemented.

Protection against litigation

eReserve Plus's fastidious data retention allows managers to view which resources have been accessed, how often, and by whom, for super-accurate, category-leading real-time data. eReserve Plus is the only digital delivery platform that offers universities best-in-class defense against copyright litigation.

Seamless integration

eReserve Plus works with all the leading library, discovery, and learning management systems and integrates with your existing platforms for data collection, retrieval and management.

Fair licensing fees

Valuable analytics data ensures that universities make licensing and subscription decisions based on evidence, resulting in vast savings over the 'best guess' model, which puts tertiary institutions at a financial disadvantage.

Radically improved workflow

Time spent on copyright management and the bottle-necking and double handling associated with unwieldy resource list creation is all but eliminated, along with time savings for faculty and students. eReserve Plus gets everybody working together, better.

Everybody wins

Contact us for a free trial or demonstration and learn how eReserve Plus can revolutionize your resource list management and copyright management practices across the board for superior digital resource delivery and rapid ROI.
