

# Five Ways Dynamic Health™

## Improves Quality of Nursing Care

### ① **Prevent Costly Mistakes and Improve Quality Outcomes**

Dynamic Health offers nurses and allied health professionals a comprehensive collection of evidence-based content covering diseases and conditions, procedures, medications, skills and competencies, patient education handouts as well as leadership and management topics enabling them to provide the highest level of care possible.

### ② **Reduce Serious Reportable Events**

The evidence-based information in Dynamic Health allows nurses and allied health professionals to achieve the National Quality Forum's National Quality Strategy Goals and ensures that front-line staff always have an authoritative, unbiased resource to aid in clinical decision making.

### ③ **Recruit and Retain the Highest Quality Nursing Staff by Achieving Magnet® Status**

Dynamic Health supports all five ANCC Magnet Model Components and can help your organization to be recognized as an elite nursing facility.

### ④ **Improve Organizational Performance by Meeting Applicable Regulatory Standards**

Dynamic Health provides easy-to-use tools that improve nursing competencies in the areas of: rights and responsibilities of the individual, provision of care, treatment and services, medication management, infection prevention and control, leadership, human resources, information management, test/labs, cultural care, and more.

### ⑤ **Save Time and Earn In-Context CEs**

Dynamic Health provides reliable, evidence-based answers for clinical questions and allows nurses to earn contact hours right at the point of care.
