Meet Stacks

Stacks is a web-based content management system (CMS) that empowers your staff to curate valuable resources and provide easy access to critical knowledge for your organization's success.

- Build and manage your own research portal with no technical assistance

- Create individual department portals

- Boost employee satisfaction with a seamless user experience

Improve Search

Stacks provides easily configurable search formats for the ultimate content retrieval experience.

Stacks Bento Search

- Organize bento by subject, content and source type

- Search EBSCO Discovery Service, catalog and the website simultaneously**

- Configure categories with drag-and-drop layouts

***API license required**

EBSCO Discovery Service (EDS) Integration

Stacks is the only website creation tool to offer seamless, turnkey EDS integration.*

- Link directly to the EDS interface, or keep users in the same environment with Stacks' unique overlays

- Create customized search filters, featured tabs, bento boxes and result buttons

- Leverage EDS for quick creation of Resource Flows and other content modules

- Ensure relevant results — every time

* EDS is a separate purchase (not included with Stacks purchase).
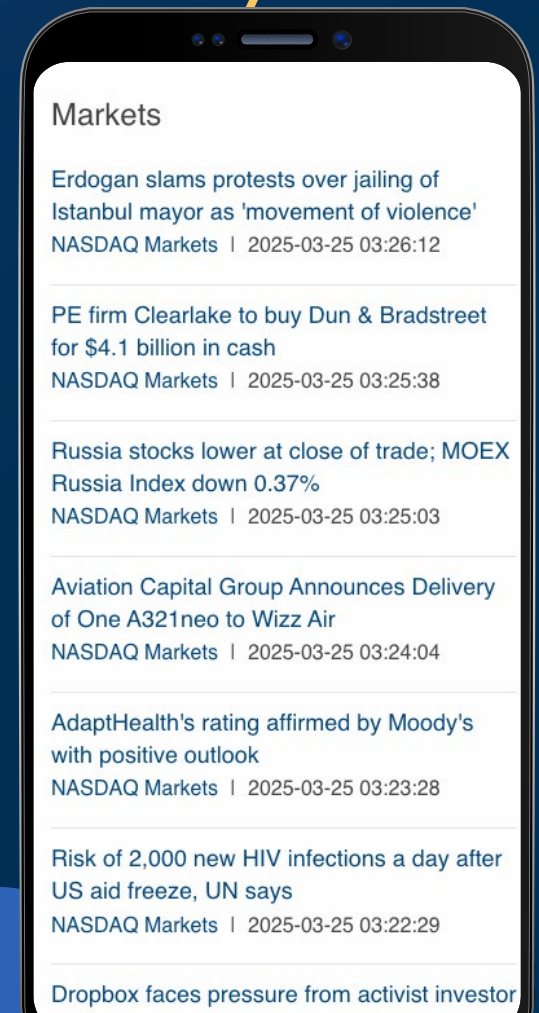

Enhance Researcher Workflows

With customizable themes, a modern UI and easy-to-use features, improving the researcher experience has never been simpler.
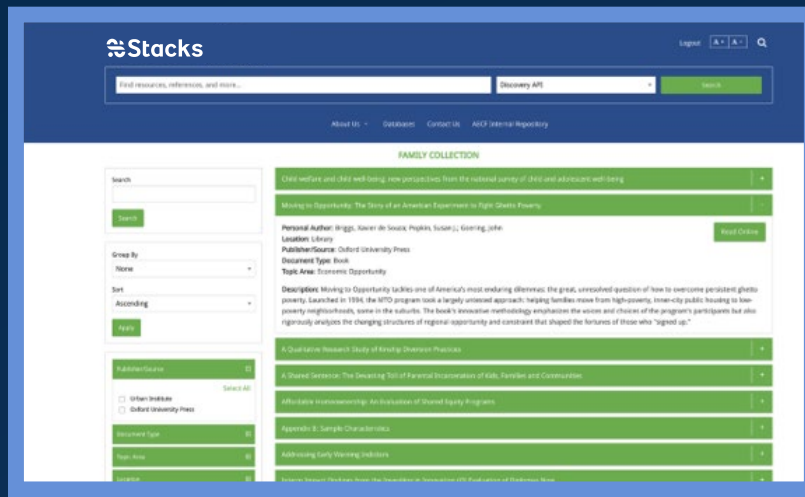

Themes

Change the look and feel of your portal in seconds without impacting content or layout. Include institutional branding, colors and logos for a cohesive design experience.

RSS Feeds

From industry news to competitors, RSS feeds can be configured and added to your research portal.
