Who We Are

EBSCO has delivered **trusted research** content for over 30 years, empowering R&D, Medical Affairs, and MedTech professionals worldwide. Our full-text databases provide seamless access to peer-reviewed scientific literature, regulatory and clinical trial data, and market intelligence.

Our **research platforms** combine intuitive design with powerful search technology. Trusted by pharmaceutical companies, universities, and healthcare providers worldwide, they streamline access and help teams move from question to insight faster.

Our Mission

Deliver relevant information to people whenever and however they need it.

A Global Approach

We support the highest levels of research across multiple verticals and markets.

130,000

organizations around the world use EBSCO

100 BILLION

searches a year across our research databases

95%

of colleges and universities around the world subscribe to EBSCO

Why EBSCO?

Superior Content Coverage and Quality

We partner with the world's leading scientific publishers, professional organizations, academic institutions, and commercial intelligence leaders.

Access Peer-Reviewed Full Text

Our research databases cover a range of subjects and provide access to thousands of e-books, conference proceedings and journals (many without embargoes).

Enhanced Search Capabilities

Advanced research platforms make it easy for employees to find all the information resources available at your company and easily organize, share, and save.

EBSCO

Research Databases

Our publisher partnerships result in access to high-quality research content, including comprehensive databases, peer-reviewed journals, and evidence-based medical and pharmaceutical studies.

Biotechnology Source: The largest collection of full-text journals (over 8,000) indexed in MEDLINE, EMBASE, and BIOSIS – designed specifically for life sciences research.

MEDLINE Ultimate: The largest full-text companion to the MEDLINE index, providing medical professionals and researchers with unparalleled access to 2,500 active full-text journals, including numerous top biomedical publications.

Business Source Corporate Plus: Provides comprehensive business intelligence, industry reports, and market research.

Applied Science & Technology Source Ultimate: Offers access to scientific research, technical reports, and industry insights to strategically define and optimize system architecture with data-driven foresight.

APA PsycInfo™: This database is the world's largest resource devoted to peer-reviewed literature in behavioral science and mental health. Produced by the American Psychological Association, it is an indispensable tool for the discovery of global scholarly research.

Cochrane Collection Plus: This collection is an essential source of high-quality health care data, not only useful for providers and patients, but also for those responsible for researching, teaching, funding, and administering at all levels of the medical profession.

Search & Authentication Technologies

EBSCO's research platforms combine intuitive design with powerful search. Trusted by pharmaceutical companies, universities, and healthcare providers worldwide, our platforms streamline access, helping teams move from question to insight faster.

EBSCO Discovery Service supports unified searching of content across full-text databases, citation databases, internal documents, and other subscription research content.

- **One-Click Full-Text Access:** Instant access to full-text content.
- **Advanced Search Features:** Powerful search tools to quickly pinpoint relevant resources.
- **Personalization:** Easily save searches, receive notifications for new research content, and organize materials into project-specific folders with seamless sharing capabilities.

Stacks is an enhanced search experience that combines the simplicity of a self-service content management system (CMS) with powerful tools to create a tailored internal research website.

- **Seamless Integrations:** Connect effortlessly to internal repositories, SharePoint, and authentication tools.
- **Researcher-focused Features:** RSS feeds, multilingual capabilities, and department-specific profiles.
- **Mobile Accessibility:** Extend your platform with intuitive native mobile apps for iOS and Android.

OpenAthens provides modern single sign-on (SSO) technology and better IP/Proxy experience, simplifying access to your organization's electronic resources.

E-Books and Journals

These resources are the perfect complement to our research databases – providing users with the full spectrum of content.

EBSCO eBooks: Choose from a wide variety of e-books with topics ranging from marketing to finance and supply chain management. With EBSCO's Custom Collections, teams can tailor their e-book library to focus on exactly the topics they need, ensuring relevance, scalability, and alignment with strategic priorities.

Our growing collection offers an easy-to-use experience with no sign-in required; no restrictions on printing, saving, or downloading; and no limits on compatible devices or apps.

Journal Subscriptions: Our team can curate fit-for-purpose collections, specific to your therapeutic focus, development phase, and strategic priorities. Whether you are in early discovery, preparing for regulatory review, or generating real-world evidence post-launch.

Point-of-Care Tools

Bridge the gap between research and practice with evidence-based point-of-care tools. Provide clinicians with real-time access to critical medical guidelines, treatment pathways, and clinical summaries—all integrated to support confident decisions.

DynaMedex®: This evidence-based clinical decision support tool seamlessly combines the clinical expertise and extensive, curated disease content of DynaMed®, with the comprehensive depth and breadth of drug information and natural language query of Merative Micromedex®.

DynaMed®: A clinical-decision support tool to ensure evidence-based decision-making and support of regulatory compliance by providing rigorously reviewed, up-to-date content. DynaMed offers insight into how products are being used in treatments.

- Track the latest developments in specific therapeutic areas with daily updates and get notified automatically when evidence has changed on a specific drug or disease.
- Provide your MSLs with access to the latest evidence-based information on drugs and treatments in practice.

Trusted Research Content for Pharma R&D, Medical Affairs, and MedTech Teams

Unlock the full spectrum of research content, from full-text journals and regulatory insights to market intelligence, engineered to accelerate drug discovery, streamline product development, and enhance scientific credibility across the life sciences, biotech, and medical device sectors.
