

SMART Scientific & Medical ART

PRODUCT UPDATE
January 2025

Here's what's new this year for the SMART Imagebase, a subscription website featuring medical images and animations from Nucleus Medical Media, Inc.

50+ New Animations

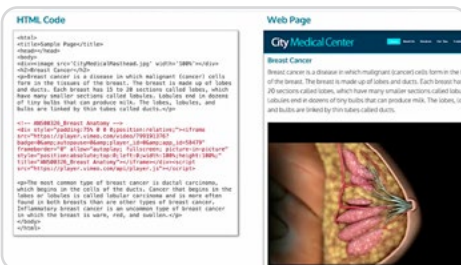

The new animations include highly requested topics such as diabetic food care, the A1C test, and checking your blood sugar. [Learn more.](#)

500+ New 3D Images

Our editors have selected some of the best key frames to use as graphics for education and editorial application from Nucleus's award-winning 3D animations. [Learn more.](#)

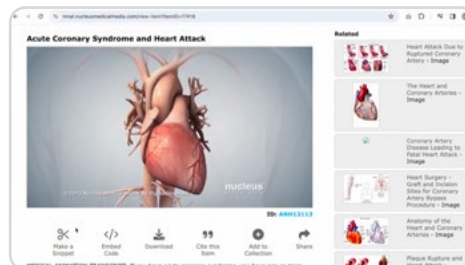

300+ New Translations

Working with subject experts at major hospitals in China and India, Nucleus has translated the audio of our most popular animations into [Mandarin](#) and [Hindi](#).

Embedded Animations

Embedding 3D animations is a quick and easy way to make your web-connected learning courses and patient education materials more engaging and easier to understand. [Learn more.](#)

New Snippet Tool

With our new Snippet Tool, you can quickly make short, animated movies from any Nucleus animation to bring your course or presentation to life! [Learn more.](#)

Collections Features

It's easy to assemble and share Nucleus images and animations with your students, trainees or colleagues using this simple tool. [Learn more.](#)

QRx Video System

Create trackable URL codes for your online and print materials that link to Nucleus medical animations. Better yet, you can measure the impressions, views, clicks, and conversions using the QRx online dashboard! [Learn more.](#)
