Discover the powerful interdisciplinary advantage of *APA PsycInfo*

- Explore the full breadth of research in the behavioral and social sciences with confidence. Focused on the interdisciplinary aspects of the worldwide behavioral and social science research and literature, *APA PsycInfo* is unmatched as a resource for locating scholarly research findings in psychology and related fields across a host of academic disciplines — from the historical to the cutting edge.
- Quickly locate trusted peer-reviewed research, with the help of professional indexing by APA experts
- Shorten the amount of time spent searching by easily identifying:
 - Document types, such as journal articles, book chapters, book reviews and editorials
 - Specific research methodologies, such as clinical case reports, empirical studies and literature reviews
 - Documents that have tests or assessment instruments appended
 - Research from a specific grant or funding source
 - And much more

Authoritative

APA has been publishing authoritative bibliographic records since the end of the 19th century, initially with *Psychological Index* and followed by *Psychological Abstracts* in 1927. *APA PsycInfo* was introduced in 1967 and since that time has been governed by policy direction from esteemed scholars and scientists from within APA's membership. *APA PsycInfo* offers indexing for research literature and findings from the 16th century to the present, charting the evolution of psychology over time through peer-reviewed journals, books, and dissertations.

Current & Comprehensive

APA PsycInfo remains one of the most current resources available for exploring and locating mental health and social science research. It includes features such as First Posting for journal records, ensuring access to the abstract or bibliographic record of the earliest publication of a journal article.

High Quality

The content in *APA PsycInfo* is selected by APA experts based on quality and relevance to the field. Each bibliographic record is then meticulously created and reviewed by APA's skilled and knowledgeable staff. Additionally, record monitoring continues post-release to ensure the highest level of accuracy for each individual record. Complete database reloads occur regularly, allowing for ever-increasing functionality, the inclusion of new fields, and enhanced indexing features.

Field Information and Indexing

Record Contents

- Bibliographic citation
- Abstract
- Table of contents for books
- Author affiliations and correspondence addresses
- Indexed with terms from the *Thesaurus of Psychological Index Terms*[®]
- Broad classification categories
- Population and age information as well as geographical location of the research group
