- Recent updates have been made to the *APA Thesaurus of Psychological Index Terms®* to enhance search and discoverability by providing more than 9,900 terms that reflect changes within the behavioral and social sciences

Leading Scientific Journal Articles to Inform Meaningful Research

Access to the latest high-quality research

Updated twice weekly, APA PsycArticles connects you to current full-text journal articles written by respected researchers from across psychology and the behavioral and social sciences. Discover the latest scholarship that will shape and inform your research.

A convenient, single collection of APA journals

With many journal issues going back to Volume 1, Issue 1, APA PsycArticles offers users complete access to research on specific areas of study — expertly indexed for easy discovery.

Rigorous research and scholarship you can trust

To ensure the highest quality scientific standards and scholarship, each journal article follows a meticulous peer-review process overseen by renowned APA journal editors.

APA PsycArticles is the premier gateway to exchange ideas, elevate knowledge and maximize the communication and application of psychology. APA journals have a significantly higher share of citations relative to the number of articles published. APA's reporting standards, APA Style JARS, influence research communications across the field of psychology by helping authors more effectively communicate important and relevant aspects of their research. By adhering to these guidelines, contributors to APA PsycArticles enhance transparency and scientific rigor, and advance the field of psychological science.

APA journal editors are among the most esteemed scholars and scientists in the social sciences, and each one is selected through a competitive process governed by the prestigious APA Publications & Communications Board.
