Unified Data Ecosystem

Bring order to your complex web of data sources and scientific subscriptions. We'll help you manage all your information assets in one streamlined portfolio.

- Reduce data silos and information gaps
- Improve resource access across scientists, clinical teams, and compliance.
- Ensure the right information is available to support critical decision-making

Agile Collection Management:

Our centralized platform is built to grow with you, ensuring your teams are equipped with the tools they need now and in the future.

- Ability to add and drop titles & build information collection specific to your needs.
- Stay future-ready with a system that evolves with your growing information needs.

Powerful Budgeting Insights

Reduce unnecessary spending by eliminating underused resources, freeing up budget for more impactful tools and data.

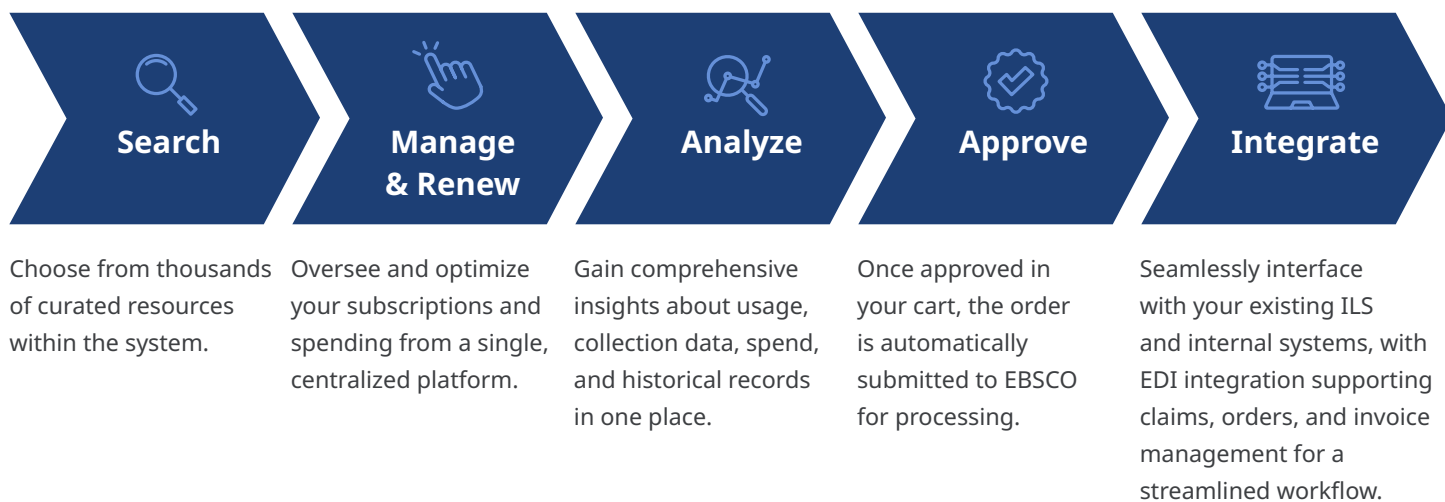

- Make data-backed decisions about your collection
- Eliminate redundancies and minimize unnecessary costs
- Optimize spend to reallocate resources where they are most needed
- Reallocate resources efficiently with confident, usage-based budgeting

Expert-Led Publisher Negotiations:

Benefit from decades of industry experience and strong publisher relationships, ensuring you receive optimal pricing and contract terms built on trusted partnerships.

- Leverage 80+ years of unmatched industry insight
- Customized agreements based on actual usage
- Optimize spend without sacrificing premium content

End-to-End Resource Management Made Easy

Features:

Managing information should not be another obstacle in drug and medical device development.

- Access to the most recent STM titles
- Access to complete collection data, historical records, all in one place for streamlined management
- Expert support for streamlined operations and quick issue resolution
- Flexible integration with current e-procurement solution
- Collection analysis
- Consolidation/Efficiencies
- Informed Publisher negotiations
- Guided transition & training
